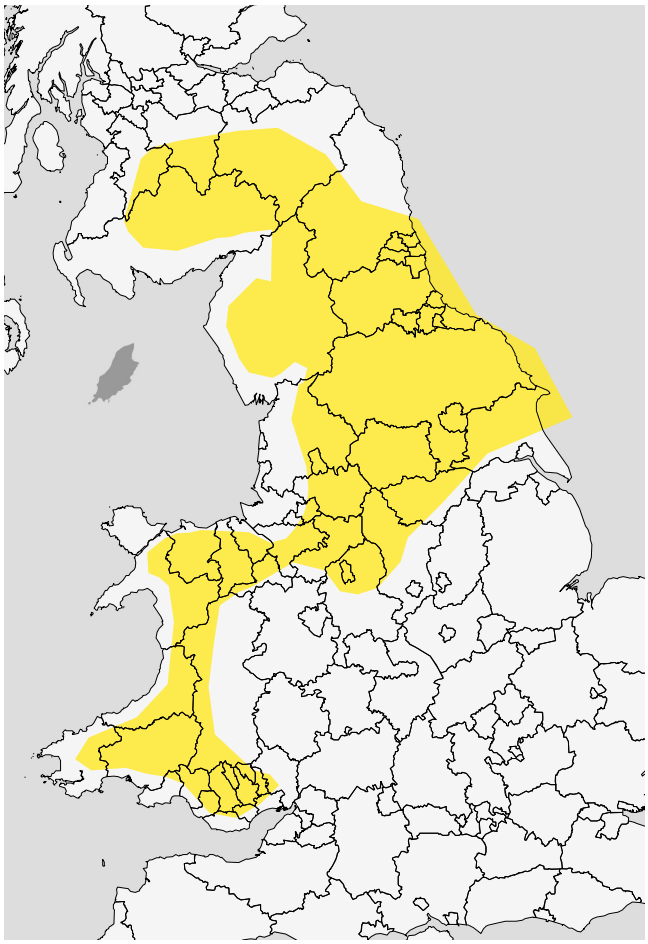
Yellow warning
Ice

Between
21:00 Fri 16 Dec 2022 and
12:00 Sat 17 Dec 2022



Showery rain and sleet, with some snow, will lead to an ice risk this morning, and possible travel disruption.

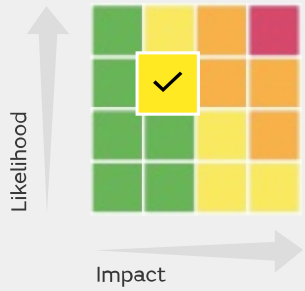
What to expect

- Probably some icy patches on some untreated roads, pavements and cycle paths, leading to increased chance of accidents and injuries
- A little snowfall in places, mainly on higher levels roads, making for longer journey times

Further details

Bands of showery rain will continue to move inland this morning, turning to sleet and snow in places, especially parts of northern England.

Surfaces are very cold at present, posing the possibility of ice in some areas, the likelihood of this perhaps increased in places by "wash-off" of road grit or salt. Above 100 to 200 metres elevation some snowfall is likely, with 2-3 cm possible in places across northern England.



✓ Medium likelihood of low impacts
